## SENTINELS FIRED UPON

IN THE RAILROAD YARDS AT EAST ST. LOUIS.

The Chicago Switchmen's Strike Becoming Serious - Disabling the Cars and Engines.

Sr. Louis, Mo., April 20.—It is gen erally conceded here that the Knights of Labor spike, so far as the business of the various reads centering in this city and East St. Lonis is concerned, is gradually losing its effect. The Missouri Pacific and Iron Mountain railroads have fully resumed traffic, according to the statements of the officials of those reads, and the roads which enter East St. Louis are doing all the business required of them and are handling promptly all freight

### LABOR NOTES.

The Chicago Switchmen's Strike. CHICAGO, ILI., April 20 -A morning paper sava: Several switchmen in the service of the Rock Island road were in conference with the commit-tee of the Lake Shore switchmen last night. There are several mon-unionists working in the Rock Island yards and union switchmen say it is their Intention to have them removed. They are giving the Lake Shore men all the aid possible, in the hope of seeing a settlement of the strike in favor of the switchman. In that event their task will be all the carier. They say that if the Lake Shore Company continues to support the non-unionists and the latter refuse to resign, it is almost certain that within the next two days the switchmen on the Rock Island road will strike. This morning at daylight Superintendent Ameden and General Freight Agent Blodgett of the Lake Shore road were premerading the tracks in the vicinity of Polk When asked about the prospects of resuming business to-day Mr. Amsden said: "I do not think that we will try to-do anything to-day. There is no use in trying to get a train past Forty-first street.

In the yards this morning there was no change in the state of affairs. The north branch of the stock-yards "Y" is still obstructed with the train switched there yesterday, and the stock yards dummy consumes from minutes more than usua solist new men ended last night in

At 8:30 o'clock engine No. 532, in charge of Engineer Weaver and Fire-man Merkle moved out of the roundhouse into the yards. General-Superintendent Wright and Yardmaster Jones and General Freight Agent Blodgett were on the engine. As the engine moved into the yards one of the strikers approached the engineer, who only shook his head in reply to questions put to him. The engine then proceeded south toward where the train which was attempted to be moved yesterday was standing, at Forty-fourth street. The cars which were standing there were surrounded by a growd of strikers, who removed the draw bar keys, completely dis-abling the cars. The engine stopped north of Forty-third street and was backed on another train of cars standing on a side track. While the attempt was being made to reach the side track coupling pins and other obstructions were put in front of the wheels These were removed by the police, but just as the engine was crossing the switch some one tried to throw the switch between the engine and tender. The man was driven away and the engine was attached to the train. About this time the crowd at Forty-fourth street having succeeded in disabling the cars up there attempted to run the caboose which was attached to the train, in which the conductor and two brakemen were, on to a side track. The conductor and brakemen rushed on to the platform and warned the crowd away. One of the men picked ductor drew a revolver. The crowd still remaining public ands for home-rushed at the brakeman and hustled steads for the people. him away, and some one hit him on-the head, knocking him senseless.

At this time the crowd left the caboose and went up to Forty-fifth street, where two cars standing on the sidetrack were moved down and derailed in front of the engine at Fortythird street. General Superintendent Wright gave up the attempt to move the train. The crowd gave a cheer, lifted the car on the track, and moved it back to its former position, repaired several awitches which had been broken and then moved back into the round-house.

Gov. Oglesby has been in consultation all day with Sheriff Hanchett and the officials of the Lake Shore road. The Supervisor of the Town of Lake, said he was unable to afford the railroad any protection against the mobs which had colle ted. It appears that the Sheriff will be called upon to organize a posse as the next move before calling on the troops. The officials consulted appear to regard serious trouble as very imminent. Gov. Ogleaby declared this afternoon that he would not interfere until the Sheriff had exhausted all his powers.

The New York Street-Car Strike. New York, April 20.-The "tie up" on the street-car lines has been partly unloosed to-day, and the cars on all the roads are running, all but the Third Avenue road sending out their regular number of cars with new drivers and conductors, but the inside and platform of these cars were filled with police officers. All along the route the new drivers and conductors

one interfered to oppose the progress of the care. The Railroad Commis-sioners were at the Murray Hill Hotel this morning. At noon they went into session to consider the case of the Third Avenue railroad.

Commissioner O'Donnell said he was told that the Third Avenue Company was running twenty-five cars to-day. He also stated that Director Latterbach, of that road, was willing to submit the matter to arbitration, and it was thought that this would lead to a ettlement of the difficulty, and that he cars of the company would all be running before nightfall. The efficials of the read refuse to bother with any more conferences before the Railroad Commissioners. They ray they will fight to the bitter end nos. The men are becoming exasperated, but hope that the Railroad Commissioners will be able to arbitrate. They say the struggle is for life or death now, and they are ready for peace or war.

The Eight-Hour Agitation at Mil-

MILWAUKEE, WIS, April 20 .- Some weeks ago a committee appointed by the workmen at the shops of the St. Paul Railway Company called upon General Manager Miller with a re-quest that the eight-hour system be established in the shops, the wages to remain as at present. Mr. Miller has replied to the request, stating that the company cannot grant what is asked. To-day the committee will make their report to the workmen, and Mr. Miller has given the men a half day in order that all may get together and hear the report. There is little likelihood of a strike.

The 200 employes of the Wisconsin Malicable I on Company have made a formal demand for the regulation eight-hour system and for semi-monthly payments. They have given the com any till May 1st to say whether they will accede to the demands.

The workmen at E. P. Allis's shops have repudiated the settlement made by their committee with Mr. Allis a week ago, and now it looks as though a strike would result.

Colored Knights of Labor.

GALVESTON, Thu., April 20.—A special to the News from Texarkana says: It has been discovered that within the past three weeks the Knights of Labor have organized several colored assem-blies in the vicinity of Texarkana, both in Arkansas and Texas. The movement is regarded with apprehen-

The Locomotive Firemen

PARSONS, KAS., April 20 .- About sixty delegates are here to-day to at-Lodge of the Brotherhood of Locomotive Firemen. The meeting will convene at 4 o'clock, and in the meantime much log-rolling is being done to en-deavor to persuade the firemen and engineers to take sides with the Knights of Labor in their strike, but it is generally conceded that their efforts will be without avail. Barry, the agitator, will present the case of the Knights to the meeting in session. The Brotherhood of Firemen have grievances against the Missouri Pacific Railroad Company, but it is predicted that they will be settled amicably and satisfactorily to all concerned.

### LAND FRAUDS.

A Ramor That the President Will Ask Congress to Interfere.

New York, April 19.—A special from Washington, D. C., to the Herald says: There is a rumor that the President has been making one of those careful and laborious studies to which he is given of the public land question, and that he has become so thoroughly convinced of the vastness of the land frauds, and the misuse of the present land laws for land-grabbing by syndicates and corporations and of the necessity of a thorough re-form of both the land laws and the land administratio , that he will presently send a special message to Congress urging its immediate action up a coupling and was about to throw in the way of reform and repeal of it at the brakemen when the con- bad laws to help him in saving the

The First Bessemer Steel Converted in the South, CHATTANOGA, TENN., April 20.— The first Bessemer steel converted in the South was made here yesterday by the South Tredegar Works. The experimental cast of two gross tons proved excellent steel on the rolls and under all tests applied. The material used was pig-iron from Cranberry ores, North Carolica, and shows that ore to be excellent steel material. The plant has a capacity of eighty-five tons per day. The success of this experiment has caused much gratifica-

Reports of Committees - The Day Spent by the Senate in Executive Session.

Washington, April 20.—Senute — The Chair laid before the Senate a communication from the Secretary of the Interior, transmitting, in compliance with a recent resolution of the Sen-ate, detailed information relating to the lands of the Northern Pacific Railroad Company, the number of acres

The report accompanying the bill mr. L mb. rt, who is his mother-ir-law, for making slanderous statements tures of the different States for similar laws, and up to the present year the wishes of the people have been complied with in fourteen States. As an evidence that the people earnestly desire a law like the one suggested, the committee point to the fact that petitions bearing the names of 71,276 persons have been presented to this Congress asking for its ensument. The effect of similar laws in the different States where they are in force has, in the opinion of the committee, proven her life. If so, the petition states that the punishment is a penalty disproening evil to humanity and the general welfare. The report argues the bill invades no right of self-govern-ment. The measure had the vital merit of involving no political signifi-cance, but appealed to the very foun-dations upon which popular self government rested—the intelligence of the people. It was difficult to see how many objections could be raised to such a statute except by those who feared to have the next generation educated upon a subject universally recognized to be of the most vital importance to individual bealth and

social security.

The report says that the soldiers and sailors of the country bave for years demanded this change in the law, and the committee thinks that the demand is just and reasonable. A minority report is submitted by Mr. Clemens and Mr. Blanchard [La.], in which the argument is made that the amend-ments to the law would be a violation of the alleged fundamental principle of the civil service law that appointments should be made alone upon merit, ascertained by competent ex-

amination. Mr. Skinner [N. C.], from the Com-mittee on Indian Affaire, reported back the Senate bill to extend the laws of the United States over the Indian Territory. House calendar.

HEALED BY A "MIRACLE." Woman in Plainfield, Who Was Blind, Tells How She Was Cured.

Plainfield, N. J., has a sensati n. Miss Louisia Maun, af er being totally bind for twenty-two years, has suddenly regained her sight. The town is not given to sensations. It grows attenuated along the line of the railroad to the south until it becomes a double row of frame houses on each side of the ra lroad track. One of these is the abode of the Manns, a family which left Virginia not many years ago. Their faces show the dark hue and the fervid religious temperament of the South-the very dark hue of the extreme south of Africa. Some of the palings are gone from the feace about their dooryard. Miss Louisa was summoned from an upper room and came down s'owly and hesitatingly. Her eyes blinked and rolled, and she rolled her head on one side in trying to use them. They geemed to become weary with little use. When only seven years old, Louisa fell downstairs and in two days "went blind," as her old mother ex-plained. She was in bed for three months and after getting about again was subject to occasional "very bad spells," or epileptic fi s. Her general health continued to grow worse and one physician, who examined her eyes in Virginia, said that she was too young to have them operated upon and nothing further has ever been done for them. Seven years ago she joined the Methodist Church and since coming to Plainfield has attended the Baptist Church. A year ago Miss Dunbar of Boston, who was a member of a Faith-Cure Congrega-tion, went to Plainfield and became interested in the sufferer and instructed her in the tenets of her own faith, to which she believed her own re-

covery from an illiness to be due. She used to come and sit with me,' said Louisa, 'and read to me from the Bible, and told me to trust in the Lord and He'd make me well again. Judge Lynch in Texas.

Navasora, Tex., April 20.—Another mysterious victim of Judge Lynch was found above this city yesterday, near the village of Washington, on Brazos river. A farmer named Wilson found the body of a light co ored mulatto floating near the shore. He tied the corpse to a tree and notified the near-est justice of the peace, who held an inquest on the body. The examina-tion revealed a dark blue mark around the neck, which was broken. The ankles of the mulatto also bore marks of the rope, indicating that weights had been tied to his feet. His skull was broken, as though from the blow of a revolver handle, probably to stiffs his cries.
